

Dashboard from the Kaggle dataset

The above is the "Adidas USA Sales Dashboard" which is made using the Kaggle dataset.

Sales by Month shows the total number of sales made in the months from 2020 to 2021 in the end of 2021 Adidas has made a total sales of 7,421,483 and the lowest number of sales was made in December 2020 with 746,654.

The darker the color on the map, the more sales are made in the state. New York state has made more sales than compared to the other states in the USA.

The circular graph which talks about which sales method has made more profit tells us that people tend to buy Adidas in stores rather than in Outlet and in Online.

The top 3 sales-making retailers for Adidas are West Gear, Foot Locker, and Sports Direct in the USA.

Depending on the filters being applied, the dashboard will be changed accordingly. For example
